## DOWNLOAD THE MINECRAFT: JAVA EDITION SERVER

Want to set up a multiplayer server?

**Please note:** This server setup is only compatible with Minecraft: Java Edition.

If you want to run a Minecraft multiplayer server by yourself things get kind of involved (see [this wiki article for a tutorial](#)). First make sure you can use java from the command line. On Linux and macOS this should already be set up but on Windows you might have to tinker with the PATH environment variable.

 [Click Here](#)

Download [minecraft\\_server.1.13.2.jar](#) and run it with the following command:

```
java -Xmx1024M -Xms1024M -jar minecraft_server.1.13.2.jar nogui
```

Should you want to start the server with its graphical user interface you can leave out the "nogui" part.

Just so you know, by downloading any of the software on this page, you agree to the [Minecraft End User License Agreement](#) and [Privacy Policy](#).
